THE ONLY GOLF POLO WITH BUILT IN UPF50+ COMPRESSION SUN SLEEVES

BECAUSE the game of Golf is hard enough.

We founded the YOOVEE Golf brand with one clear vision in mind: to make sun-safe golf effortless, comfortable, and stylish. As avid golfers ourselves, we were all too familiar with the distractions and discomfort caused by traditional sun protection methods—slathering on sunscreen before a round, reapplying at the turn, and wrestling with sun sleeves that slip, bunch, or simply don't feel right.

We thought: There has to be a better way. That's when we asked ourselves: *Why are golfers still piecing together sun protection?* So, we designed something so effective and so much easier.

The mission: build a smarter kind of golf apparel—one that offers UPF50+ sun protection without the hassle. No more separate sleeves to lose or wash. No more greasy sunscreen breaks. Just sleek, lightweight performance wear that protects you from the sun the moment you step out of the house and onto the course.

Every piece in our collection is made with advanced, breathable fabric which wicks away sweat and body odour, and we are the ONLY golf polo that has UPF50+ compression sun sleeves sewn directly into the polo (at the shoulder) meaning they move with your swing, not against it. No more readjusting or pinching. It's sun protection you never have to think about—built right into the gear you already wear.

We're not just making shirts—we're removing barriers. We're giving golfers more focus, more freedom, and more time to enjoy the game.

Welcome to the end of sleeve struggles and sunscreen stress.

Welcome to sun-safe golf, simplified..... Welcome to YOOVEE GOLF - **Just Put it on & Play!**
